Internship Experience

Machine Learning Intern

Goodz.in | Oct 2024 – Dec 2024

- Built and optimized ML models for real-world business cases, achieving a 15% boost in classification accuracy.
- Engineered scalable pipelines with Scikit-learn for training and evaluation; used metrics like precision, recall, F1-score.
- Applied feature engineering and hyperparameter tuning techniques, improving model efficiency by 20%.
- Contributed to code reviews and agile sprints, promoting collaborative development and cross-team learning.

AI & Generative Engineering Intern

Synchroni Global IT Solutions | May 2025 – Present

- Developed scalable AI-powered backend services using FastAPI, LangChain, and MongoDB.
- Integrated LLM frameworks (LlamaIndex, Lamini, LangChain) to build dynamic, prompt-driven enterprise solutions.
- Designed and deployed robust APIs for chatbot interfaces using custom fine-tuned language model pipelines.
- Collaborated with DevOps teams to containerize and deploy solutions in test environments using Docker and Kubernetes

PROJECTS

Smart Resume Screening Assistant using NLP & LLMs

- Built an intelligent resume screening tool using **Natural Language Processing** and **LangChain-powered LLMs**.
- Used **TF-IDF**, **BERT embeddings**, and **Cosine Similarity** to match JD keywords with resumes.
- Integrated with **Streamlit** for UI and deployed using **FastAPI** backend and **MongoDB** for document storage.
- Achieved 91% accuracy in identifying best-matching candidates from a dataset of 500+ resumes

Retail Demand Forecasting System using Machine Learning

- Developed an end-to-end demand forecasting pipeline for a retail chain using **time-series analysis** and **supervised learning models**.
- Collected and cleaned over **2 years of historical sales data** from multiple outlets; handled missing values, outliers, and seasonal trends using **Pandas** and **NumPy**.
- Performed feature engineering to capture holidays, promotions, and store-type effects.
- Trained and compared models like **ARIMA**, **Random Forest Regressor**, and **XGBoost**, selecting the best based on RMSE and MAE.
- Achieved **93% forecasting accuracy**, enabling better inventory planning and reducing stockouts by 30% in the simulation.
- Deployed the best-performing model using **FastAPI** and integrated with **Power BI** for real-time visualization of demand trends.

SKILLS

- **Programming:** Python, SQL, FastAPI
- **Libraries/Frameworks:** Scikit-learn, Pandas, NumPy, TensorFlow, LangChain, LlamaIndex
- **ML/AI:** Supervised & Unsupervised Learning, Model Evaluation, Feature Engineering, Hyperparameter Tuning, Generative AI
- **Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Tools:** Git, Jupyter, MongoDB, Postman
- **Soft Skills:** Problem-solving, Teamwork, Communication, Agile Methodology

EDUCATION

Lords Institute of Engineering and Technology — Hyderabad, India
Bachelor of Technology in Information Technology

2021 - 2025

CERTIFICATIONS

BCG Data Science Job Simulation** – Forage | April 2025

- Completed customer churn analysis project using Python, achieving 85% prediction accuracy via

LangChain for LLM Application Development (DeepLearning.AI)
